Part I — Getting Started

1. System Overview

Inertia POS is a web-based Point of Sale system for retail stores. It runs in your web browser on desktop, tablet, or mobile. Core capabilities include:

-  Fast sales processing with barcode scanning, product search, and keyboard shortcuts
-  Real-time inventory tracking with low-stock alerts
-  Continuous shift management with cash reconciliation and Z-Read reports
-  Sales analytics, reports, and data export
-  Multi-user system with Admin and Cashier roles
-  Thermal receipt printing via USB or Bluetooth
-  Fully responsive — works on phone, tablet, and desktop

Role Comparison

Feature	Admin	Cashier
Dashboard	✓	✗
POS Terminal	✓	✓ (default)

Feature	Admin	Cashier
Inventory — View	✓	✓
Inventory — Edit/Delete	✓	✗
Stock Adjustment	✓	✓
Transactions — View	✓	✓
Transactions — Void	✓	✗
Shift History	✓ (all users)	✓ (all users)
Reports & Analytics	✓	✗
Settings — Edit Store	✓	✗
Settings — Hardware	✓	✓
Settings — Z-Read / Close Shift	✓	✓
User Management	✓	✗

2. Login & Account Setup

Logging In

1. Open your browser and go to your store's POS URL.
2. The system redirects to the **Login** page.
3. Enter your **Email** and **Password** and click **Log In**.

After login:

- **Admins** → redirected to the **Dashboard**
- **Cashiers** → redirected to the **POS Terminal**

First-Time Staff Account Setup

When an admin adds you as a new staff member, you will receive an **email invitation** containing a unique setup link. This link is **signed and time-limited** for security.

1. Click the link in your invitation email.
2. You will be taken to the **Account Setup** page.
3. Fill in your details: Full Name, Password, phone number, address.
4. Click **Complete Setup**.
5. Log in with your email and the password you created.

[!IMPORTANT] The invitation link is single-use and expires. If it has expired, ask your admin to resend the invitation.

Changing Your Password / Profile

1. Click your profile name or avatar in the top-right corner of the sidebar.

2. Go to **Profile**.
3. Update your name, phone, or password as needed.
4. To change your email, you will be required to verify with an **OTP** sent to the new email address.

3. Navigation & Layout

Sidebar Navigation

The sidebar is on the left side on desktop, accessible via the hamburger menu (☰) on mobile.

Admin sidebar items:

Item	Page
 Dashboard	KPIs and live sales feed
 Inventory	Products and stock management
 Transactions	Full sales history
 Shifts	Z-Read and shift records
 Reports	Analytics and export
 Settings	Store configuration
 Users	Staff management

Cashier sidebar items:

Item	Page
 POS Terminal	Main selling screen
 Inventory	View products, adjust stock
 Transactions	View sales history
 Shifts	View shift records
 Settings	Hardware and shift close

Mobile Layout

- Tap ☰ to open the navigation drawer.
- On the POS Terminal, a floating **"View Order"** bar at the bottom opens the cart view.
- The terminal alternates between the **product catalog** and **cart** on mobile.

Part II — Cashier Guide

4. Shift System — How It Works

[!IMPORTANT] Understanding how shifts work in this system is critical. **Shifts are continuous** — there is no manual "Open Shift" button on the POS terminal. The system automatically tracks time periods between Z-Read closings.

How the Continuous Shift Model Works

The system does **not** require you to manually start a shift. Instead:

- **Starting cash** is determined automatically: it equals the **actual cash count entered at the last shift close**.
- If there has never been a shift closed before, starting cash defaults to **₱0.00**.
- Sales are tracked from the **end of the last shift** to the **current moment**.
- The shift "period" covers all time since the previous Z-Read (close).

This means:

- You can start selling **immediately** after logging in.
- The system is always "in shift" — tracking all sales continuously.
- The only action you perform is **closing the shift** (Z-Read) at the end of the day or your work period.

Live Shift Summary (Settings Page)

Cashiers can view the current shift's running totals at any time by going to **Settings → Shift Summary**:

- **Starting Cash** — the actual cash count from the last close (or ₱0 if first time)
- **Cash Sales** — total cash sales since last close
- **Expected in Drawer** — Starting Cash + Cash Sales
- **Digital Sales Breakdown** — GCash, Maya, Credit, Debit (if any)
- **Total Gross Sales** — all payment methods combined

5. Using the POS Terminal

The POS Terminal is split into two panels side by side (on desktop and tablet):

Left Panel	Right Panel
Current Order (Cart)	Product Catalog

On mobile, these alternate — tap "**View Order**" at the bottom to switch to the cart.

Product Catalog (Right Panel)

Toolbar Controls

Control	Function
Category button	Opens a category filter dropdown
Search bar	Search products by name or SKU/barcode
Wholesale Mode toggle	Switch all prices to wholesale pricing

Control	Function
Results Only toggle	Hide catalog until a search is typed (scan-mode)
+ Custom Item button	Add a new product on the fly

Searching for Products

- **By name** — Type any part of the product name
- **By SKU/Barcode** — Type or scan the barcode. When a single match is found or a SKU is exact-matched, the system auto-selects and opens the quantity modal
- **USB Barcode Scanner** — Plug in a USB scanner. Scanning auto-triggers the quantity entry modal with a beep
- **Camera Scanner** — Available in Inventory for scanning barcodes via the device camera

Filtering by Category

1. Click the **Category** button (left of the search bar) — or press **F5**.
2. A dropdown appears with colored category badges.
3. Select a category. The catalog filters immediately.
4. Select **All Categories** to clear.
5. Press **Escape** or click outside to close the dropdown.

Product List Columns (Desktop)

Column	Description
SKU / Barcode	Unique product code (click to copy)
Product Name / Category	Name + colored category badge
Stock	Remaining available stock
Price	Retail or wholesale price (depends on mode)

Stock Color Indicators

Color	Meaning
 Green	Normal stock level
 Orange	Low stock (fewer than 10 units)
 "Sold Out"	Zero stock — item cannot be added to cart

[!NOTE] Stock shown in the catalog is **remaining stock minus what is already in the current cart**. So if a product has 5 in stock and 3 are already in your cart, it shows 2 remaining.

Adding a Product to Cart

1. Click or tap any product row in the catalog.

2. A **Quantity Modal** appears.
3. The quantity field defaults to **1**.
4. Type the desired quantity (validated against available stock).
5. Press **Enter** or click **Add to Cart**.

If the item's SKU was scanned with a USB scanner, the product is added immediately with the quantity prompt.

Wholesale Mode

Toggle the **Wholesale Mode** switch (or press **F2**) to activate wholesale pricing:

- All products in the catalog display their **wholesale price** instead of retail.
- Cart totals are calculated using wholesale prices.
- Applies to all items — you cannot mix retail and wholesale in one transaction.

Results Only Mode

Toggle **Results Only** (or press **F3**) to hide the product catalog until you type or scan something. This is useful for high-speed scan-only checkout workflows.

6. Processing a Sale

Cart Panel (Left Side)

The cart shows:

- All items in the current order
- Per-item: Quantity, Product Name, Unit Price, Line Total
- Footer: Subtotal, Senior/PWD Discount (if applied), and **Grand Total**

Cart Column Headers (Desktop)

Column	Description
Qty	Quantity with +/– buttons (appear on hover or when selected)
Description	Product name with remove (×) button
Price	Unit price
Amount	Line total (Qty × Price)

Modifying Cart Items

Action	Method
Increase qty by 1	Click + button (appears on hover/focus), or press + key when item is selected
Decrease qty by 1	Click – button (appears on hover/focus), or press – key

Action	Method
Remove one unit	– button / – key (when qty is 1, item is removed)
Remove all units	Click the × (X) button beside the item name, or press Backspace/Delete when item is selected
Edit quantity directly	Click the item row in the catalog again and enter new qty in the modal
Clear entire cart	Click the Clear (F10) button at the top of the cart → confirm

Cart Navigation (Keyboard)

Press **F6** to toggle **Cart Navigation Mode**:

- An item in the cart is highlighted with an indigo ring
- **Arrow Up/Down** — move selection between items
- **+ / –** keys — increase / decrease quantity of selected item
- **Backspace/Delete** — remove selected item entirely
- **Escape** — exit cart navigation mode

Checkout

1. Review all items and the **Grand Total** in the cart footer.
2. Click **Checkout (F12)** — the **Checkout Modal** opens.

Checkout Modal — Payment Method Selection

The modal presents **three top-level payment categories**:

Category	Key (F-Key)	Sub-methods
Cash	F1	Cash only
E-Wallet	F2	GCash (F3), Maya (F4)
Card	F7	Credit (F8), Debit/BancNet (F9)

Cash Payment

1. Select **Cash (F1)**.
2. Enter the **Cash Received** amount.
3. The **Change Due** is calculated and displayed automatically.
4. If cash given is less than the total, the system blocks submission with an error.
5. Click **Confirm Payment (Enter)** to complete.

E-Wallet Payment (GCash / Maya)

1. Select **E-Wallet (F2)**.
2. Choose **GCash (F3)** or **Maya (F4)**.

3. Enter the **Payment Reference Number** (from the GCash/Maya transaction).
4. Click **Confirm Payment (Enter)**.

[!IMPORTANT] A reference number is **required** for all E-Wallet and Card payments. The system will not allow submission without it.

Card Payment (Credit / Debit)

1. Select **Card (F7)**.
2. Choose **Credit (F8)** or **Debit/BancNet (F9)**.
3. Enter the **Terminal Reference Number** (from the card terminal receipt).
4. Click **Confirm Payment (Enter)**.

After Checkout — Success Screen

After a successful transaction, a **Payment Successful** screen appears with two options:

Button	Action	Keyboard
Print Receipt	Sends receipt to connected thermal printer	Enter
New Order	Clears the success screen, ready for next sale	Escape

The cart is cleared automatically after a successful checkout.

7. Discounts — Senior / PWD

The system includes a **Senior Citizen / PWD discount** feature, which is the only built-in discount type. There is no separate "Custom Discount" option.

Senior / PWD Discount Button

Located at the top-right of the cart panel. It is labelled **Discount (F9)**.

- Pressing **F9** or clicking the **Discount** button toggles the Senior/PWD discount on or off.
- When **active**, the button turns yellow/amber to indicate it is applied.
- The cart footer displays: **Less: Senior/PWD (20%)** with the amount deducted.

How the Discount is Calculated (Backend — Philippine Standard)

- A **20% discount** is applied to the entire subtotal.
- The backend (`PosController`) applies: `discountAmount = subtotal × 0.20`, then `total = subtotal - discountAmount`.
- This is recorded in the sale record as `discount_amount` and `is_senior = true`.
- No VAT-exclusive recalculation is shown in the UI — the 20% is a flat subtotal discount.

[!NOTE] The Senior/PWD discount is a **single toggle for the entire order**. It cannot be applied to individual items only.

8. Hold & Recall Orders

Hold Orders (also called "Parked Orders") let you save the current cart and serve a different customer, then come back to the saved order later.

Holding (Saving) an Order

1. With at least one item in the cart, click the **Save (F8)** button.
2. A dialog box appears asking for an optional **Reference Note** (e.g., "Table 5" or "Juan Santos").
3. Enter a note or leave blank (a random order number is assigned automatically).
4. Click **Save Order**.
5. The cart clears immediately, ready for a new order.

Recalling a Held Order

1. Click **Recall (F7)** in the cart header.
2. The **Held Orders Modal** opens, listing all saved orders with their reference notes and totals.
3. Navigate with the **Arrow Up/Down** keys or click on an order.
4. Press **Enter** or click **Recall** to load the order into the cart.

[!WARNING] Recalling an order **replaces your current cart entirely**. If you have items in the cart, hold or clear them first.

Discarding a Held Order

In the Held Orders modal:

- Navigate to the order you want to discard.
- Press **Backspace** or **Delete**, or click the discard option.
- Confirm the deletion.

The order is permanently deleted from the held orders list.

Keyboard Shortcuts in the Held Orders Modal

Key	Action
Arrow Up/Down	Navigate between orders
Enter or F7	Recall the selected order
Backspace / Delete	Discard the selected order
Escape	Close the modal

9. Closing a Shift (Z-Read)

At the end of your work period, you perform a **Z-Read** to close the shift. This records your cash count, calculates over/short, and emails a summary to all store admins.

How to Close a Shift

1. Go to **Settings** in the sidebar.
2. Click the **Shift Summary** accordion section to expand it.
3. Review the live summary (Starting Cash, Cash Sales, Expected in Drawer, Digital Sales).
4. Click the **"Perform Z-Read & Close Shift"** button.
5. The **Close Shift Modal** appears with two steps.

Close Shift Modal — Step by Step

Step 1: Drawer Cash Count (Required)

- Count the physical cash in your drawer.
- Enter the **actual cash count** in the large input field (in Philippine Peso ₱).
- This is the total cash physically present in the drawer.

Step 2: Total Expenses (Optional)

- Enter any cash that was **taken out of the drawer for store expenses** (e.g., petty cash payments).
- Leave at **₱0.00** if no cash was removed.

Click "Finalize & Close Shift"

The system calculates:

```
Expected in Drawer = Starting Cash + Cash Sales - Expenses
Difference = Actual Count - Expected in Drawer
```

If **Difference** > 0 → **Drawer Overage** (more cash than expected)

If **Difference** < 0 → **Drawer Shortage** (less cash than expected)

If **Difference** ≈ 0 → **BALANCED**

Z-Read Summary Screen

After closing, a **Z-Read Summary** is displayed showing:

Item	Description
Starting Cash	Cash at the start of this period (last close's actual count)
Cash Sales	Total cash received from all cash transactions
Less: Expenses	Cash removed from drawer for expenses (if entered)
Expected in Drawer	Starting Cash + Cash Sales - Expenses
Actual Count	The amount you physically counted
Drawer Status	BALANCED / Overage / Shortage
Non-Cash Sales	GCash, Maya, Credit Card, Debit/BancNet totals
Total Gross Sales	All payment methods combined

After Z-Read

Two action buttons appear:

Button	Action
Print Z-Read Report	Sends the Z-Read to the connected thermal printer
Logout	Logs you out of the system cleanly

[!IMPORTANT] The **actual cash count you entered becomes the starting cash for the NEXT shift period**. Count your drawer carefully before entering — there is no way to edit this after closing.

[!TIP] After closing, the system emails a shift summary to all store admins automatically.

10. Cashier Settings Page

Navigate to **Settings** in the sidebar. Cashiers see a read-only store info card on the left, and the following accordion sections on the right.

Left Card — Store Identity

- Displays the **store logo**, **store name** (read-only).
- Below the logo: **Address** and **Phone** displayed as read-only text.

Hardware Section

Click **Hardware** to expand.

POS Keyboard Shortcuts (Desktop only)

Toggle to **Enable** or **Disable** F-Key shortcuts (F1–F12) for the POS Terminal on this device. Only visible on screens ≥ 1024 px wide.

Full Screen Mode

Toggle to enter or exit browser fullscreen mode for a distraction-free POS display.

Thermal Printer

The printer card shows:

- **Connection Status:** Connected (USB) / Connected (Bluetooth) / Offline (with a pulsing dot indicator)
- **Paper Width:** 58mm or 80mm selector

If not connected:

- On **desktop**: Click **Pair USB** to open the browser's USB device picker.
- On **mobile**: Click **Pair Bluetooth** to open the Bluetooth device picker.

If connected:

Button	Action
Test Print	Sends a test page to verify connection and paper width
Open Drawer	Triggers the cash drawer to open (if connected via printer)
Disconnect	Unpairs the current device

Shift Summary Section

Click **Shift Summary** to expand. Shows live running totals for the current shift period:

- Started (date/time of last close, or beginning of time if first shift)
- Active Shift badge
- Starting Cash
- Cash Sales
- Expected in Drawer
- Digital Sales breakdown (GCash, Maya, Credit, Debit — only shown if > ₱0)
- Total Gross Sales

At the bottom: "**Perform Z-Read & Close Shift**" button.

Legal & Agreements Section

Click **Legal & Agreements** to expand.

Two documents are available to view (read-only for cashiers):

- **Staff Acceptable Use Policy**
- **Staff Privacy Policy**

Click **View Terms** or **View Privacy** to open each document in a scrollable modal.

Part III — Store Admin Guide

11. Dashboard

The Dashboard is the admin's home screen. It **auto-refreshes every 5 seconds** silently.

KPI Cards (Top Row)

Card	What it shows
Today's Revenue	Total sales amount for today
Today's Profit	Revenue minus total cost of goods sold
Transactions	Number of completed sales today
Avg. Order Value	Average sale amount per transaction

Each card includes a **growth arrow** (↑ or ↓) with a percentage comparing today to the previous day/period.

Sales Trend Chart

An area/line chart showing daily sales for the past 7 days. Hover over data points to see exact values. The chart only renders if there is at least one day with a sale > 0.

Recent Transactions

A live table of the most recent sales:

- Transaction time
- Item count / summary
- Payment method (colored badge): Cash (gray), GCash (blue), Maya (green), Credit (purple), Debit (indigo)
- Total amount

Low Stock Panel

Products below the low-stock threshold are shown here for quick identification. Use this to reorder inventory before items run out.

12. Inventory Management

Navigate to **Inventory** in the sidebar. Inventory data auto-syncs every 5 seconds.

Product Table

Each product row shows:

- Product image (thumbnail)
- SKU / Barcode
- Product name
- Category (colored badge)
- Cost Price
- Retail Price
- Wholesale Price
- Stock Quantity
- Status (Active / Archived)
- Actions menu (:)

10 products are shown per page with pagination controls.

Filtering & Searching

Filter	Description
Search	Filter by product name or SKU
Category	Dropdown to filter by one category

Filter	Description
Low Stock	Toggle to show only products with low inventory
Status	Show All, Active only, or Archived only

Adding a New Product

1. Click **+ Add Product** (top-right corner).
2. The **Add Product Modal** opens.
3. Fill in the fields:

Field	Required	Notes
Product Name	✓	Display name
SKU / Barcode	✓	Unique identifier; can scan with USB scanner while modal is open
Category	✓	Select from existing categories
Cost Price	✓	Purchase/landed cost (used for profit calculations)
Retail Price	✓	Customer-facing selling price
Wholesale Price	✗	Optional; used when Wholesale Mode is active in POS
Initial Stock Qty	✓	Starting inventory count
Product Image	✗	JPEG / PNG photo

4. Click **Save Product**.

[!TIP] USB barcode scanner support is active while the Add Product modal is open. If the scanner types into another field, the system automatically redirects the input to the SKU field.

Editing a Product

1. Click the **: Actions** menu on the product row.
2. Select **Edit**.
3. Modify any fields.
4. Click **Save Changes**.

Archiving vs. Deleting

Archive (recommended): Hides the product from the POS catalog without deleting it. The product's sales history is preserved.

1. Click **: Actions** → toggle to **Archive** (or use the Status toggle).
2. To restore: Filter by **Archived**, find the product, toggle back to **Active**.

Delete (permanent):

1. Click **: Actions** → **Delete**.
2. Confirm the deletion.

[!CAUTION] Product deletion is **permanent** and cannot be undone. Use Archive unless you are certain.

Stock Adjustment

For manual stock changes (receiving new shipment, corrections, etc.):

1. Click : **Actions** → **Adjust Stock**.
2. Enter the adjustment value:
 - Positive number → add stock (e.g., **+50** to receive 50 units)
 - Negative number → reduce stock (e.g., **-5** for damaged/lost)
3. Enter a reason/note.
4. Click **Save Adjustment**.

Printing Barcode Labels

1. Click : **Actions** → **Print Label**.
2. Select quantity of labels to print.
3. Select format:
 - **Thermal** — for direct thermal printer
 - **A4** — for printing a sheet of labels on standard paper
4. Click **Print**.

Bulk Import (Excel / CSV)

1. Click the **Import** button.
2. Download the **Template file** to see the required column format.
3. Fill in your product data. To assign a new category, simply type the new category name in the Category column — it will be created automatically.
4. Upload the completed file.
5. Review the import preview and confirm.

Exporting Inventory

Click the **Export** button and choose:

- **Excel (.xlsx)** — Full product data spreadsheet
- **PDF** — Printable formatted inventory report

13. Category Management

Categories organize products in the POS catalog and inventory.

Opening the Category Manager

In the Inventory page, click the **Manage Categories** button.

Adding a Category

1. Click + **Add Category**.
2. Enter the **Category Name**.

3. Pick a **Color** — used as the badge color in the POS and inventory.
4. Click **Save**.

Editing a Category

1. Click the **Edit** (pencil) icon next to the category.
2. Change name or color.
3. Click **Save**.

Deleting a Category

1. Click the **Delete** (trash) icon.
2. Confirm.

[!WARNING] Deleting a category **removes the category assignment** from all products in that category. Those products will have no category until reassigned. This does not delete the products themselves.

14. Transaction History

Navigate to **Transactions** in the sidebar. Data auto-refreshes every 5 seconds.

Transaction List

Each row shows:

- Invoice number (e.g., **INV-001-20260703-0012**)
- Date and time
- Cashier name
- Payment method (badge)
- Total amount
- Status: **Completed** or **Voided**

Filtering Transactions

Filter	Description
Search	Filter by invoice number or cashier name
Start Date / End Date	Date range filter
Payment Method	Filter by Cash, GCash, Maya, Credit Card, or Debit Card

Viewing Transaction Details

Click the **view icon** on a row to open the **Transaction Detail Modal**:

- Invoice number and transaction timestamp
- Cashier name
- Full itemized list: Product Name, Quantity, Unit Price, Line Total
- **Senior/PWD Discount** (if applied)

- Grand Total
- Payment method
- Cash Given and Change (for cash transactions)
- Reference number (for E-Wallet / Card)

Reprinting a Receipt

In the Transaction Detail Modal or directly from the list:

- Click the **Print / Reprint Receipt** icon.
- Requires a printer connected in Settings.

Voiding a Transaction

[!WARNING] Voiding a transaction is **permanent and irreversible**. It automatically **restores inventory stock** for all voided items.

Only **Admins** can void transactions.

1. Open the Transaction Details.
2. Click **Void Transaction**.
3. A confirmation dialog appears.
4. Confirm the void.

The transaction status changes to **Voided** and stock quantities are restored.

Exporting Transactions

Click **Export** to download filtered transactions as:

- **PDF** — Formatted transaction report
- **Excel (.xlsx)** — Spreadsheet for analysis

15. Shift History

Navigate to **Shifts** in the sidebar. Data auto-refreshes every 5 seconds.

Shift List

Each row shows:

- Cashier name
- Shift start time (beginning of the period, i.e., the previous close time)
- Shift end time (the Z-Read close time)
- Status

Filtering Shifts

Filter	Description
Search	Search by cashier name

Filter	Description
Start Date / End Date	Date range filter

Viewing Shift Details

- 1. Click the **View** icon on a shift row.
- 2. The **Shift Details Modal** loads data from the server.
- 3. The modal shows:

Field	Description
Cashier Name	Who closed the shift
Start Time	Time the period began (previous close)
End Time	Time the Z-Read was performed
Starting Cash	Actual count from the previous close
Cash Sales	Sum of all cash transactions in this period
GCash Sales	Sum of GCash transactions
Maya Sales	Sum of Maya transactions
Credit Card Sales	Sum of credit card transactions
Debit/BancNet Sales	Sum of debit card transactions
Expenses	Cash removed from drawer
Total Gross Sales	All payment methods combined
Expected in Drawer	Starting Cash + Cash Sales – Expenses
Actual Cash Count	What the cashier counted
Difference	Overage (+) or Shortage (–)

Reprinting Z-Read

In the Shift Details modal, click **Print Z-Read** to send the historical Z-Read to the connected printer.

Exporting Shift Reports

Click **Export** to download shift history as a **PDF** report.

16. Reports & Analytics

Navigate to **Reports** in the sidebar. **Admin only.**

Date Range Selection

Quick Presets:

- Today
- Yesterday
- Last 7 Days *(default on first load)*
- Last 30 Days
- This Month
- Last Month

Custom Range: Use the date picker inputs. Reports auto-refresh when the date range changes (with a 500ms debounce).

Summary KPI Cards

KPI	Description
Total Revenue	Sum of all completed sales in the period
Total Profit	Revenue minus total cost of goods
Total Orders	Number of completed transactions
Avg. Order Value	Average transaction amount

Each KPI shows a growth % vs. the previous equivalent period.

Sales Trend Chart

An area chart showing **daily sales** over the selected date range. Helps identify trends, peak days, and slow periods.

Peak Hours Heatmap

A heatmap showing which hours of the day generate the most sales — useful for staffing schedules and promotional timing.

Peak Days & Peak Months

Charts showing which days of the week and months of the year have the highest transaction volumes.

Payment Method Breakdown

A pie chart comparing:

- Cash
- GCash
- Maya
- Credit Card
- Debit Card

Top Selling Products

A ranked list of best-performing products by units sold and revenue generated.

Category Performance

A bar chart and table showing revenue contribution by product category.

Exporting Reports

Click **Export** to choose:

- **PDF** — Multi-section formatted report
- **Excel (.xlsx)** — Raw data for custom analysis in spreadsheet software

17. User Management

Navigate to **Users** in the sidebar. **Admin only**. Data auto-refreshes every 5 seconds.

User List

Each row shows:

- Account Number (auto-assigned)
- Full name
- Email address
- Role: **Admin** or **Cashier**
- Status: **Active** or **Inactive**

Filtering Users

Filter	Description
Search	Search by name, email, or account number
Role	Filter by Admin or Cashier

10 users per page with pagination.

Viewing a User Profile

Click the **view (eye) icon** on a user row to open a read-only **User Profile Modal** showing all their details: name, account number, email, role, phone, address, city, province, avatar.

Adding a New Staff Member

1. Click **+ Add User**.
2. Fill in the form:

Field	Required	Notes
Full Name	✓	
Account Number	✓	Auto-incremented; can be customized
Email	✓	Used as login username

Field	Required	Notes
Role		Admin or Cashier
Phone Number		Numbers only
Address / City / Province		
Password		Initial login password
Avatar Photo		Profile picture

3. Click **Save User**.
4. The staff member receives an **email invitation** with a setup link to complete their profile.

Editing a Staff Member

1. Click : **Actions** → **Edit** (or open the profile modal and click Edit).
2. For most fields: edit directly and save.
3. **To change the email address:**
 - Enter the new email.
 - Click **Send OTP**.
 - An OTP is sent to the **new email address**.
 - Enter the OTP in the verification field.
 - Save changes.

Activating / Deactivating a User

1. Click : **Actions** → **Toggle Active Status** (or click the status toggle).
2. A deactivated user cannot log in. Reactivate by toggling again.

Deleting a User

1. Click : **Actions** → **Delete**.
2. Confirm.

[!CAUTION] User deletion is permanent. Consider deactivating instead to preserve audit history.

18. Store Settings

Navigate to **Settings** in the sidebar.

Left Card — Store Identity

Displays the store **logo** and **store name**. Admins see an **Edit Details** button here.

Edit Store Details (Admin Only)

Click **Edit Details** to open the Edit Store Modal:

Field	Description
Store Logo	Click the logo circle or "Choose new image" to upload (JPEG, PNG, WebP — max 2MB, recommended 500×500px)
Store Name	Business name shown on receipts and the system header
Address	Physical store address
Phone Number	Contact number

Click **Save Changes** to apply. The logo and store name update immediately across the entire system including the sidebar header.

Store Details Accordion (Admin)

Click **Store Details** to expand a read-only view of the current store name, address, and phone.

Legal & Agreements (Admin Only)

Click **Legal & Agreements** to expand. Contains four policy documents:

Document	Who it applies to
Platform Terms of Service	Store admins / store owners
Platform Privacy Policy	Store admins / store owners
Staff Acceptable Use Policy	All cashiers and staff
Staff Privacy Policy	All cashiers and staff

Click **View Terms** or **View Privacy** to open each in a scrollable modal. These documents are managed by the platform and are read-only for store admins.

Hardware Section (Admin)

Admins have access to the same hardware settings as cashiers — see [Section 10](#) for the full hardware guide.

Part IV — Reference

19. Keyboard Shortcuts (F-Keys)

[!NOTE] Keyboard shortcuts are available on **desktop only** (screen width ≥ 1024 px). They can be enabled/disabled via Settings → Hardware → POS Keyboard Shortcuts toggle.

POS Terminal — Main Screen

Key	Action
F1	Toggle focus on the Search bar
F2	Toggle Wholesale Mode on/off
F3	Toggle Results-Only Mode
F4	Open Add Custom Item modal
F5	Open/close Category filter dropdown
F6	Toggle Cart Navigation mode (highlights cart items)
F7	Open Held Orders (Recall) modal
F8	Save (hold) current order
F9	Toggle Senior/PWD Discount
F10	Clear cart (with confirmation)
F11	Open cash drawer
F12	Open Checkout modal
Arrow Up/Down	Navigate product list (from search bar)
Enter	Add highlighted product / confirm quantity
Escape	Close any open modal or dropdown

Cart Navigation (when F6 is active)

Key	Action
Arrow Up/Down	Move between cart items
+ / = / Numpad +	Increase qty of selected item
- / Numpad -	Decrease qty of selected item
Backspace / Delete	Remove entire selected item from cart
Escape	Deactivate cart navigation

Category Dropdown (when open via F5)

Key	Action
Arrow Up/Down	Navigate categories
Enter	Select highlighted category
Escape	Close dropdown

Held Orders Modal (when open)

Key	Action
Arrow Up/Down	Navigate held orders
Enter or F7	Recall highlighted order
Backspace / Delete	Discard highlighted order
Escape	Close modal

Checkout / Payment Modal (when open)

Key	Action
F1	Select Cash payment
F2	Select E-Wallet payment
F7	Select Card payment
F3	Select GCash (<i>when E-Wallet is active</i>)
F4	Select Maya (<i>when E-Wallet is active</i>)
F8	Select Credit Card (<i>when Card is active</i>)
F9	Select Debit/BancNet (<i>when Card is active</i>)
Enter	Confirm payment
Escape	Cancel / close modal

After Checkout — Success Screen

Key	Action
Enter	Print receipt
Escape	New order (dismiss success screen)

Add Custom Item Modal (when open)

Key	Action
F1	Focus SKU / Barcode field
F2	Auto-generate next sequential SKU
F3	Focus Product Name field
F5	Open Category dropdown
F6	Focus Initial Stock field
F7	Focus Cost Price field
F8	Focus Retail Price field

Key	Action
F9	Focus Wholesale Price field
Enter	Submit the form
Escape	Close modal

20. Payment Methods Reference

Method	Category	Badge Color	Input Required
Cash	Cash	Gray	Cash amount received (change auto-calculated)
GCash	E-Wallet	Blue	GCash reference / transaction number
Maya	E-Wallet	Green	Maya reference / transaction number
Credit Card	Card	Purple	Card terminal approval code
Debit / BancNet	Card	Indigo	Card terminal reference number

21. Roles & Permissions Summary

What Cashiers Can Do

Feature	Access
POS Terminal — sell	✓ Full
Wholesale Mode	✓ Full
Senior/PWD Discount	✓ Full
Hold & Recall Orders	✓ Full
Add Custom Items (POS)	✓ Full
Open Cash Drawer	✓ Full

Dashboard	✗ No
Settings — View store info	✓ Read-only
Settings — Edit store info	✗ No
Settings — Hardware config	✓ Full
Settings — Z-Read / Close Shift	✓ Full
Settings — View legal policies	✓ Read-only
User Management	✗ No

What Admins Can Do

Everything Cashiers can do, **plus**:

Feature	Access
Dashboard	✓ Full
Inventory — Add/Edit/Delete	✓ Full
Inventory — Bulk Import/Export	✓ Full
Category Management — Full CRUD	✓ Full
Transactions — Void	✓ Full
Reports & Analytics	✓ Full
Settings — Edit Store Details	✓ Full
Settings — View Legal Policies	✓ Full
User Management — Full CRUD	✓ Full
Activity Logs	✓ Full

22. Troubleshooting

● Cannot process a sale — "No shift" message

Reality: The system uses a **continuous shift model**. You can sell any time without opening a shift. If you see a "no active shift" notice in the Settings page's Shift Summary, it simply means there are no sales recorded since the last Z-Read — this does not block you from selling.

● Product shows "Sold Out" but should be in stock

Cause 1: The item's remaining stock minus the quantity already in your cart equals zero. **Fix:** Check your current cart. If items are already there, that stock is reserved.

Cause 2: Actual inventory is zero. **Fix (Admin):** Go to Inventory → find the product → Adjust Stock to add units.

● Barcode scan doesn't find the product

Cause: The barcode on the physical item doesn't match the SKU stored in the system. **Fix:** Check the product's SKU in Inventory matches the barcode exactly. Test by scanning into a text editor first.

● Receipt is not printing after checkout

Symptom	Fix
No printer shown	Go to Settings → Hardware → Pair USB (desktop) or Pair Bluetooth (mobile)
Printer paired but nothing prints	Check paper roll is loaded. Click Test Print to verify.
Wrong receipt width / text cut off	Go to Settings → Hardware → change Paper Width to match roll (58mm or 80mm)
Bluetooth printer disconnected	Go to Settings → Hardware → Disconnect, then re-Pair

● "Missing Reference" error when paying by E-Wallet or Card

Cause: A reference/approval number is required for all non-cash payments. **Fix:** Enter the GCash/Maya transaction number or the card terminal receipt code before confirming.

● Cannot void a transaction

Cause: Only Admins can void transactions. Cashiers do not have this permission. **Fix:** Ask your store admin to process the void.

● "Insufficient Cash" error during checkout

Cause: The cash amount entered is less than the total amount due. **Fix:** Enter the correct amount the customer is paying. The system won't allow change to be negative.

● Starting cash seems wrong on Z-Read

How it works: Starting cash is always the **actual cash count from the previous Z-Read**. If the previous cashier entered an incorrect amount at close, that carries forward. **Fix:** Enter the correct actual count this time. Going forward, closing counts must be accurate.

● Session expired / redirected to Login

Cause: Browser session has timed out due to inactivity. **Fix:** Log in again. Your cart data is stored locally in the browser and should still be present after re-login.

● Report data appears incomplete

Cause: Z-Reads were not performed, or the date range filter excludes the period. **Fix:**

1. Verify the date range selected in Reports.
 2. Confirm that cashiers performed Z-Reads covering the periods you're analyzing.
 3. Use **Last 7 Days** preset first to confirm current data is loading.
